

Toys are the things that we play with.

They can be anything from pieces of string to dolls or computer games. Toys can be any shape and size.

One of the oldest toys found in Britain is around 2,000 years old.

Types of toys have changed over time but some toys have always been around, they just look different now, like dolls.

The way toys have changed shows what people had to use, such as stone, wood, clay, iron or plastic.

Generation - A group of people born and living around the same time

Invention - A newly designed or created object

Museum - A building where interesting or important objects are stored

Sequence - Put in order

Pastime - Hobby or way to pass time

Similar- How things are the same

Different- Things that are not the same

Teddy bears were made in the early 1900s, and are named after Teddy Roosevelt, an American president.
